ELVIS APPIAH

S O F T W A R E E N G I N E E R

PROFILE

A software engineer who loves building things for the web and learning about new ideas and techniques for productivity and workflows. I welcome programming challenges that improve my aptitude for software engineering. I excel in team collaboration and contribution and, I communicate effectively within a group setting. I am always thinking about code, and passionate about creating a community within the tech space.

EXPERIENCE

FRONTEND ENGINEER

Rigelis Inc

August, 2023 - Present

- Developed web applications using Vue.js, and Typescript in a collaborative team environment. Throughout the development process, I maintained detailed Git documentation to ensure effective version control and seamless collaboration.
- Proud to have crafted the company's cutting-edge website from the ground up. This website features a blog, a pharmacy locator and other advertisement options.
- Picked up PHP to support my web activities for backend development.

FRONTEND ENGINEER

Motes System

December, 2022 - June, 2023

- Part of a small team that developed the initial working version of the voting system, using React, and that system is being used across the country by several reputable companies, universities, and other government institutions.
- Tasked with developing websites for clients, I leveraged WordPress to efficiently accomplish this objective.
